
TRUSTED WORKSTATION
PROMPT
Supported page hooks fetch / XHR
Extension background
Local Python runtime Rules → NER → model
loopback gRPC-Web
Native-messaging supervisor
BLOCK Cancel supported request
REPORTING
Coarse event fields
Local budget ledger and randomization
REMOTE SERVICES
Web-hosted LLM receives original body
ALLOW / WARN
Forward original body
Verified parameters
UPDATES
Supplied labelled examples
Training runtime computes candidate
Exact-base and retention guard Reject: retain base
Publish accepted versioned weights
Telemetry collector aggregate estimates
Randomized fields only; no prompt text or training labels
